Compact Fluorescent Hardwire Ballast Features:

- Auto Restart After Hot Relamp
- Deactive Lamp Protection Circuit
- Flicker Free Operation
- High Power Factor
- Low THD
- 100% Factory Tested
- High Reliability
- No Audible Noise
- True Preheat Starting
- No Starting Aid Required
- Energy Efficient
- High Frequency Operation
- Solid State
- Moisture and Shock Resistant
- No PCBs
- Bottom Feed Models Available

Environmental Specifications

Maximum Case Temperature	80°C at "T" point
Minimum Starting Temperature	-25°C
Sound Rating	A+
Operating Humidity	95% relative humidity, non-condensating
Environmental Protection	Epoxy Sealed for moisture resistance and shock vibration resistance
Safety Listing	UL Listed, C-UL, Class P Type 1 outdoor

Electrical/Mechanical Specifications

Color	White	Current Crest Factor	≤ 1.7
Weight	See Case Styles	Open Circuit Protected	Yes
Operating Frequency	50 KHz +	RFI Suppression	Yes
Power Factor	≥ 0.99	Input Leads 10 ^{5/8} " 18 AWG solid 105 degree C stripped 3/8"	
Total Harmonic Distortion	5-13% depending on lamp/ballast combination	Output Leads 10 ^{5/8} " 18 AWG solid 105 degree C stripped 3/8"	
Deactive Lamp Protection	Yes	Meets ANSI 15 C62.41, ANSI C82.1 CLASS P	
Auto Restart After Hot Relamp	Yes	Built with two threaded studs, 2" on center and bottom center feed wiring, for easily replacing magnetic ballasts.	
Input Voltage	120V 50/60 Hz 230V 50 Hz (special order) 277V 60 Hz
